

SACHIN SHEBINAKATTI

Bangalore, Karnataka | +91-7019876417 | sachisach07@gmail.com

PROFESSIONAL SUMMARY

IT professional with 2.3 years of experience in server administration, web application deployment, and hosting operations. Deployed and managed multiple production applications including Laravel, Node.js, React.js, Next.js, and WordPress on on-premises Linux servers using PM2, Nginx, and Plesk Panel. Administered DNS, FTP, email protocols, and Bitbucket repositories across multiple client domains. AWS Cloud Practitioner certified with foundational knowledge of EC2, S3, and IAM, targeting cloud support and hosting roles.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS EC2, AWS S3, AWS IAM, Linux (Ubuntu/CentOS), Windows Server, Server Provisioning

Web Deployment & Runtime: Laravel (PHP), Node.js, React.js, Next.js, WordPress, PM2, Nginx, Apache, SSL/TLS

Hosting & DNS Management: Plesk Panel, DNS (A, MX, TXT, CNAME), FTP, IMAP, POP3, SMTP, SPF, DKIM

DevOps & Version Control: Git, Bitbucket, Jenkins, CI/CD, Repository Management, Access Control

Database & Support Tools: MySQL, Jira, Backup & Recovery, Performance Optimization, Ticketing Systems

PROFESSIONAL EXPERIENCE

IT Server Executive

Feb 2025 - Present

Web Digital Mantra IT Services, Bangalore

- Deployed and maintained multiple production web applications including Laravel, Node.js, React.js, Next.js, and WordPress on on-premises Linux servers
- Configured PM2 process manager for Node.js and Next.js applications with startup scripts, ensuring automatic recovery on server reboot
- Troubleshooted and resolved WordPress issues including plugin conflicts, theme errors, database connection issues, and performance problems
- Administered Bitbucket repositories for multiple development teams, enforcing branch policies and access controls
- Managed DNS records (A, MX, TXT, CNAME, SPF, DKIM) for multiple client domains, resolving DNS issues within 1-hour average response time
- Maintained Plesk Panel hosting environments for multiple client websites, ensuring consistent server performance and availability
- Implemented backup and recovery procedures for websites and databases, ensuring zero data loss across all hosted platforms
- Provisioned FTP accounts and configured IMAP, POP3, and SMTP protocols across client domains, ensuring reliable email delivery
- Diagnosed and resolved hosting and platform incidents on a regular basis, maintaining SLA compliance across all client accounts
- Reduced recurring support tickets by documenting resolution procedures and sharing them with the operations team
- Configured SPF, DKIM, and MX records for client domains, achieving reliable email delivery for client communications

Associate I - Lab Support Engineer

Feb 2024 - Feb 2025

UST Global (Client: Intel Technology India Pvt Ltd), Bangalore

- Administered Jira workflows, permissions, and project configurations for enterprise operations
- Provided technical support through ticketing systems and resolved issues with documented root cause analysis
- Performed troubleshooting and root cause analysis for platform integration issues
- Installed and configured Linux and Windows Server operating systems on lab machines
- Conducted system upgrades, maintenance, and platform monitoring activities
- Documented incidents, support activities, and technical resolutions in Jira for team knowledge sharing
- Assisted users with platform-related technical concerns and resolved service requests within SLA
- Collaborated with internal teams to resolve operational and infrastructure issues

- Supported server maintenance activities across rotational shift environments

KEY PROJECTS & DEPLOYMENTS

Laravel Web Application Deployment

Stack: PHP, Laravel, Linux, Nginx, MySQL, Plesk Panel, SSL

- Set up and deployed a Laravel-based website on a Linux server, configuring Nginx, SSL certificate, and domain DNS records
- Managed PHP dependencies, environment configuration (.env), and database migrations on the live server
- Implemented automated database backups and maintained the application with zero downtime after go-live

Node.js & React.js Application Deployment

Stack: Node.js, React.js, PM2, Linux, Nginx

- Deployed Node.js and React.js projects on a Linux server using PM2 for process management and auto-restart
- Configured Nginx as a reverse proxy to route traffic to the Node.js application
- Set up PM2 startup scripts to keep the application running automatically after server reboot

Node.js & Next.js Application Deployment

Stack: Node.js, Next.js, PM2, Linux, Nginx, DNS

- Deployed Node.js and Next.js projects on a Linux server and managed processes using PM2 service
- Configured Nginx, handled domain mapping, DNS setup, and SSL certificate installation
- Monitored application health through PM2 logs and resolved all post-deployment issues

WordPress Website Deployment & Support

Stack: WordPress, PHP, MySQL, Nginx/Apache, Plesk Panel, Linux

- Deployed and configured WordPress websites on Linux servers with Nginx/Apache, PHP, and MySQL
- Troubleshooted WordPress issues including plugin conflicts, theme errors, and database connection problems
- Managed WordPress updates, user roles, and site backups to maintain security and stability
- Configured domain DNS settings and SSL certificates for WordPress sites hosted on Plesk Panel

EDUCATION

Bachelor of Engineering (B.E.) - Civil Engineering

2022

East West Institute of Technology (EWIT), Bangalore

Diploma - Civil Engineering

2018

SRVR Polytechnic, Guledgudd

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) - Amazon Web Services
- DNS Fundamentals Certification - ICANN
- Git Essential Training - Completed
- DevOps Foundations Training - JSpiders, Bangalore
